

CK SURGITECH

# TRI-FLOW HYBRID TUBING

with CO<sup>2</sup> Source

10 sets/ box

CK Surgitech Tri-Flow Hybrid Tubing system is intended to accommodate various GI endoscopes and irrigation pumps. Utilizing a single water bottle for dual function, the innovative technology combines multiple products into one.

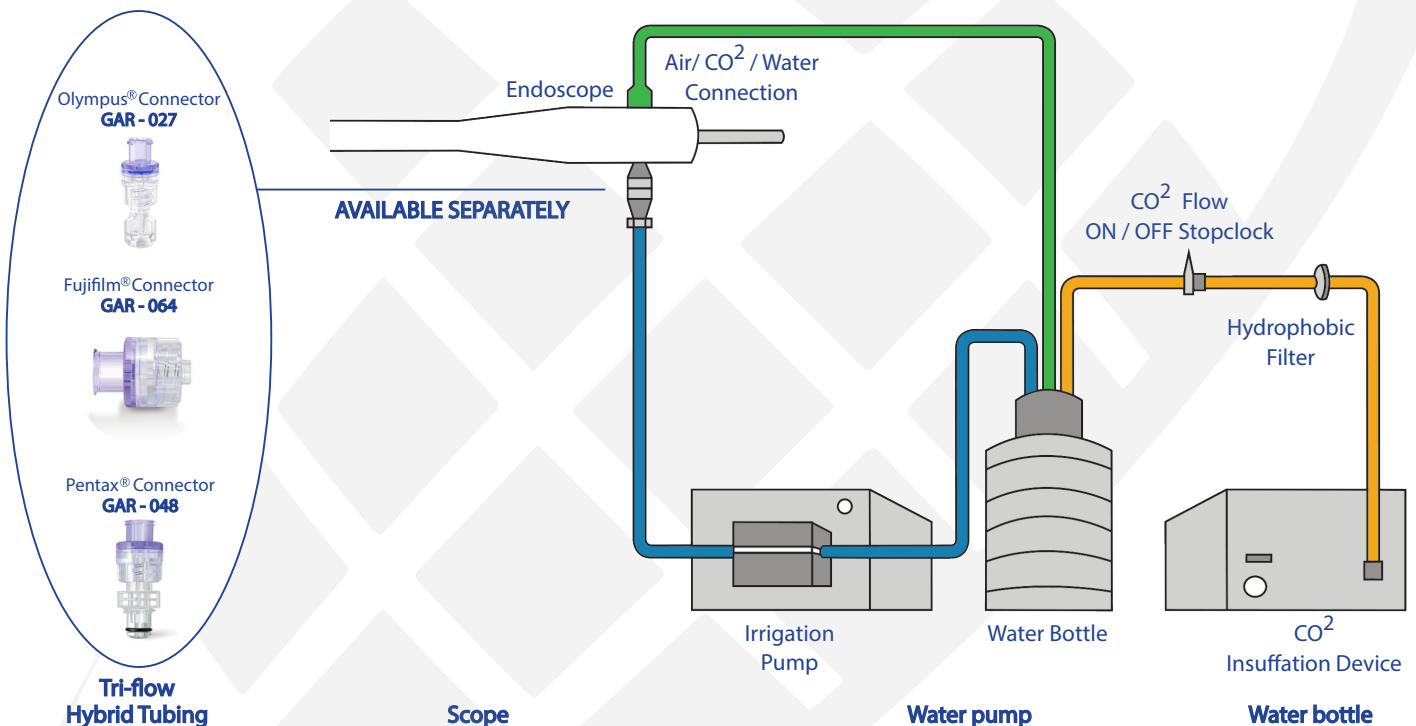

The daily use tubing combination allows 1 water bottle to deliver water for irrigation (flushing), water for lens cleaning with the addition of a CO<sub>2</sub> line with hydrophobic filter.

## Features

- 24-hour disposable
- Removes the need for manual cleaning and reprocessing of reusable water bottles and tubing
- Reduces the potential for cross-contamination by elimination of reprocessing steps

To be used in conjunction with a single patient use \*Auxiliary Water Channel Connector ( back-flow valve) **AVAILABLE SEPARATELY**

\*The backflow-prevention valve is designed to prevent backflow of contaminated fluid from the patient into the proximal irrigation system so that the water bottle and Tri-Flow Hybrid Tubing may be used safely over a 24 hour period.

Tri-flow Hybrid Tubing	Scope	Water pump	Water bottle
CIT-IT-006-KT	Hybrid Irrigation Tubing with air water and CO <sub>2</sub> with filter for <b>Olympus</b> ® Endoscope	Compatible water pumps: AFU-100, OFP, EGP-100, ERBE EIP2 or Endotechnik	Fresenius/BBraun
CIT-IT-007-KT	Hybrid Irrigation Tubing with air water and CO <sub>2</sub> with filter for <b>Fujifilm</b> ® Endoscope 500/ 600 Series	Compatible water pumps: AFU-100, OFP, EGP-100, ERBE EIP2 or Endotechnik	Fresenius/BBraun
CIT-IT-008-KT	Hybrid Irrigation Tubing with air water and CO <sub>2</sub> with filter for <b>Pentax</b> ® Endoscope	Compatible water pumps: AFU-100, OFP, EGP-100, ERBE EIP2 or Endotechnik	Fresenius/BBraun
