

BEDSIDE CLEAN KIT

The Bedside Clean Kit is a convenient way to pre-clean your endoscope after a procedure.

EACH SINGLE-USE KIT CONTAINS:

- Contoured lint free sponge imbibed with 2mL of Scopezime® Enzymatic Detergent
- 500ml Biodegradable Water Bowl

FEATURES:

- Scopezime® is designed to remove organic matter safely and effectively from scopes
- Cleaning commences on contact, preventing soil from drying on scope surfaces
- Neutral pH, non-abrasive, 100% biodegradable, and free rinsing
- Scopezime® will not harm any metals, plastic, rubber, corrugated tubing, glass, or mirrors, therefore extending the life of the endoscope
- Scopezime® consists of strong protein enzymes that act quickly, having antibacterial and anti-rust functions
- Single use kit eliminates the risk of cross contamination
