ENDOINK[™] ENDOSCOPIC TATTOO

EndoINK is a single-use fluid designed to endoscopically mark lesions in the gastrointestinal tract. Developed with a suspension liquid containing highly purified carbon particles, EndoINK creates a marker to facilitate surgical removal and examination.

- Endoscopic tattoo for reliable marking of lesions and areas of reference in the GI tract
- Conveniently available in 5ml configuration to accommodate catheter priming
- Sterile fluid supplied in a capped 5ml syringe for single patient use
